TECHNICAL SKILLS

- Python, SQL, Pandas, NumPy
- MS SQL Server, DB Design
- Power BI, Tableau, Excel/DAX
- SPSS
- Machine Learning & Deep Learning
- Microsoft Azure AI
- Agentic AI, RAG

CERTIFICATIONS

Fabric Analytics Engineer Associate — Microsoft
Power BI Data Analyst Associate — Microsoft
AWS Certified Cloud Practitioner — AWS | Jul 2026

CERTIFICATIONS & TRAINING

Google Data Analytics Professional Cert. — Google | Mar 2026
IBM AI Engineering Professional Cert. — IBM | Apr 2026
Power BI Data Analyst (PL-300) — Microsoft | May 2026
AI Agents: Foundations to Applications — Microsoft | Jun 2026

SOFT SKILLS

- Analytical & Critical Thinking
- Problem-Solving · Data Storytelling
- Communication & Presentation

LANGUAGES

Arabic — Native
English — Professional Working

EDUCATION

B.A. in Philosophy
Suez Canal University, 2012–2015

PROFESSIONAL SUMMARY

Junior Data Analyst who turns complex datasets into clear, decision-ready insights, combining a Philosophy background with hands-on technical training gained through the government-grade Digilians Initiative (MCIT × Egyptian Military Academy). Training covered Python, SQL, Power BI, Microsoft Fabric, Tableau, SPSS, AI & Machine Learning, Applied Statistics & Data Analysis, Data Mining & Visualization, Applied Deep Learning, Agentic AI, AI Tools & Emerging Technologies, Excel, Microsoft Azure Fundamentals, Leadership, and Freelancing & Freelance English Communication — culminating in a deep learning / NLP graduation project, Smart Customer Feedback Analytics. Also experienced in Generative AI, including LLMs and RAG.

PROFESSIONAL EXPERIENCE

Junior Applied AI & Data Analyst

Digital Pioneers Initiative — MCIT × Egyptian Military Academy × Digilians

- Analyzed 20+ structured datasets using Python, SQL, Excel, and SPSS to generate actionable insights under government-grade standards.
- Built automated Power BI and Tableau dashboards for real-time KPI tracking and reporting.
- Performed end-to-end data pipeline tasks: cleaning, preprocessing, feature engineering, and EDA.
- Developed and evaluated predictive ML models (regression & classification); applied Generative AI (LLM fine-tuning, RAG).

FEATURED PROJECTS

TechUni Intelligence Hub | Team Project — University Data System

Full-stack solution: SQL Server design (12 tables), Python EDA, Orange ML workflows, Power BI dashboard, and a live web dashboard on Netlify.

AI Market RAG | RAG / GenAI — Semantic Search

Retrieval-Augmented Generation pipeline over Stanford's AI Index Report 2025 using LlamaIndex, ChromaDB, and HuggingFace, deployed via Streamlit.

Grape Leaf Disease Classification System | Deep Learning — Computer Vision

Transfer Learning classifier (ResNet50 / EfficientNetB7) detecting Black Rot, ESCA, and Leaf Blight, with full preprocessing and evaluation pipeline.

Defective Chips Detection System | Deep Learning — Quality Inspection

EfficientNet-B0 / PyTorch image classification system to automatically detect defective vs. non-defective potato chips.

Body Performance — ML Classification & Regression | Machine Learning

End-to-end ML pipeline predicting body performance scores from fitness attributes, using feature engineering and tuned models.

Smart Customer Feedback Analytics | Deep Learning — Graduation Project

End-to-end deep learning / NLP system extracting sentiment insights and actionable trends from multi-channel customer feedback.

Smart Sheets Email Automation | Automation / Workflow

n8n workflow triggered on new Google Sheets rows, processing data through an LLM chain and auto-sending emails via Gmail.

PDF Knowledge Base Chatbot | RAG / Chatbot

n8n RAG chatbot watching a Google Drive folder, chunking PDFs, embedding with Google Gemini, storing vectors in Supabase for real-time Q&A.

Power BI Dashboards | Business Intelligence

20+ dashboards built with data modeling, DAX measures, and Power Query ETL — including sales, KPI, and geographic drill-through reports with interactive filters and slicers.

Excel Dashboards | Business Intelligence

10+ dashboards using PivotTables, PivotCharts, and formulas (VLOOKUP/INDEX-MATCH, conditional formatting) to summarize and visualize sales and performance data.

Tableau Dashboards | Business Intelligence

10+ dashboards with calculated fields, parameters, and visualizations for KPI tracking and executive reporting.
