ALAA SALAH

Data Analyst | Applied AI

Cairo, Egypt | +20 128 991 9230 | miss.alaa.salah@gmail.com

linkedin.com/in/alaa-dataanalytics | missalaasalah.github.io/protfolio

PROFESSIONAL SUMMARY

Data analyst with hands-on experience turning raw, messy datasets into decision-ready insights using Python, SQL, Power BI, Tableau, and Excel. Trained through Digilians (Ministry of Communications & Information Technology x Egyptian Military Academy), a competitive nine-month, 1,330-hour full-time program covering statistical analysis, machine learning, deep learning, and applied generative AI. Built and shipped 5 end-to-end ML/DL projects and 40+ BI dashboards. A philosophy background underpins the structured, logical reasoning applied to every dataset.

CORE SKILLS

Languages & Analysis: Python (Pandas, NumPy), SQL, SPSS, Statistical Analysis

BI & Visualization: Power BI, Tableau, Excel (DAX, Power Query, PivotTables)

Machine Learning & AI: Machine Learning, Deep Learning, Generative AI, LLM Fine-Tuning, RAG, Agentic AI

Cloud & Data Engineering: Microsoft Azure AI, Microsoft Fabric, SQL Server & Database Design

Workflow Automation: n8n

PROFESSIONAL EXPERIENCE

Junior Applied AI & Data Analyst Dec 2025 – Sep 2026 (Expected)

Digilians (Digital Pioneers Initiative) — MCIT x Egyptian Military Academy

- Analyzed 20+ structured datasets using Python, SQL, Excel, and SPSS to deliver actionable insights under government-grade data standards.
- Designed and automated Power BI and Tableau dashboards for real-time KPI tracking and executive reporting.
- Owned end-to-end data pipeline work: cleaning, preprocessing, feature engineering, and exploratory data analysis (EDA).
- Built and evaluated predictive machine learning models (regression and classification) and applied generative AI techniques, including LLM fine-tuning and Retrieval-Augmented Generation (RAG).

Digital Transformation & AI Training

Sadat Academy for Management Sciences *Sep 2026 (Expected)*

- One-and-a-half-month practical placement applying data analytics and AI skills in an administrative-sciences setting, following the Digilians program.

Freelance Data Analyst Feb 2026 – Present

Freelance, Remote

- Built 3 Excel and Power BI dashboards for freelance clients across different industries.

FEATURED PROJECTS

BASIRA — Customer Feedback Intelligence | *Graduation Project — Deep Learning / NLP*
Multilingual aspect-based sentiment analysis platform built on XLM-R, extracting sentiment insights and actionable trends from multi-channel customer feedback; led overall coordination across a 5-person team.

ReviewIQ AI Frontend | *Web App — React / TypeScript*
Frontend for an AI-powered review analytics tool, built with React, TypeScript, Vite, Material UI, and Recharts.

TechUni Intelligence Hub | *Team Project — University Data System*
Full-stack solution: 12-table SQL Server database design, Python EDA, Orange ML workflows, a Power BI dashboard, and a live web dashboard deployed on Netlify.

AI Market RAG | *RAG / Generative AI — Semantic Search*
Retrieval-Augmented Generation pipeline over Stanford's AI Index Report 2025, built with LlamaIndex, ChromaDB, and HuggingFace, deployed via Streamlit.

Grape Leaf Disease Classification System | *Deep Learning — Computer Vision*
Transfer-learning classifier (ResNet50 / EfficientNetB7) detecting Black Rot, ESCA, and Leaf Blight, with a full preprocessing and evaluation pipeline.

Defective Chips Detection System | *Deep Learning — Quality Inspection*
EfficientNet-B0 / PyTorch image classification system that automatically flags defective vs. non-defective potato chips on a production line.

Body Performance — ML Classification & Regression | *Machine Learning*
End-to-end ML pipeline predicting body performance scores from fitness attributes, using feature engineering and hyperparameter-tuned models.

Smart Sheets Email Automation | *Automation / Workflow*
n8n workflow triggered on new Google Sheets rows, routing data through an LLM chain and auto-sending emails via Gmail.

PDF Knowledge Base Chatbot | *RAG / Chatbot*
n8n RAG chatbot watching a Google Drive folder, chunking PDFs, embedding with Google Gemini, and storing vectors in Supabase for real-time Q&A.

Power BI, Excel & Tableau Dashboards | *Business Intelligence*
40+ dashboards across Power BI (data modeling, DAX, Power Query ETL), Excel (PivotTables, PivotCharts, VLOOKUP/INDEX-MATCH), and Tableau (calculated fields, parameters) for sales, KPI, and geographic drill-through reporting.

CERTIFICATIONS

- Power BI Data Analyst Associate (PL-300) — Microsoft, May 2026
- Fabric Analytics Engineer Associate (DP-600) — Microsoft, Jul 2026
- AWS Certified Cloud Practitioner (CLF-C02) — AWS, Jul 2026
- Azure AI App and Agent Developer Associate (AI-103) — Microsoft, Jul 2026
- Google Data Analytics Professional Certificate — Google, Mar 2026
- IBM AI Engineering Professional Certificate — IBM, Apr 2026

· Microsoft Certified: Azure Data Fundamentals (DP-900) · Microsoft, Oct 2026

EDUCATION

B.A. in Philosophy 2012 · 2015
Suez Canal University, Ismailia, Egypt

SOFT SKILLS

Analytical & Critical Thinking · Problem-Solving · Data Storytelling · Communication & Presentation

LANGUAGES

Arabic · Native English · Professional Working Proficiency
